Ware washing solutions

The Swedish companies Wexiödisk and Diskomat combine superior product know-how with the perfect logistic solution. The successful co-operation is based on many years of experience in both flight catering and the hospital sector: two demanding applications from a hygiene point of view.

- Diskomat is an engineering company with more than 50 years of experience from hospital and inflight catering solutions as well as waste system management.
- Wexiödisk is the leading supplier of dishwashing machines in Scandinavia with a network of partners all over the world. A member of the Ali Group.
- Every installation should be a good reference!

Successful co-operations

BANGKOK AIR CATERING

Bangkok Air Catering has grown significantly over the past 10 years. We have been their partner from start and through a close dialogue managed to increase their capacity and maintain a good flow.

"Our airline clients would never accept poor washing results.

We have confidence in Wexiodisk and Diskomat and they always come up to our expectations"

Linus A.E. Knobel, Managing Director,
Bangkok Air Catering

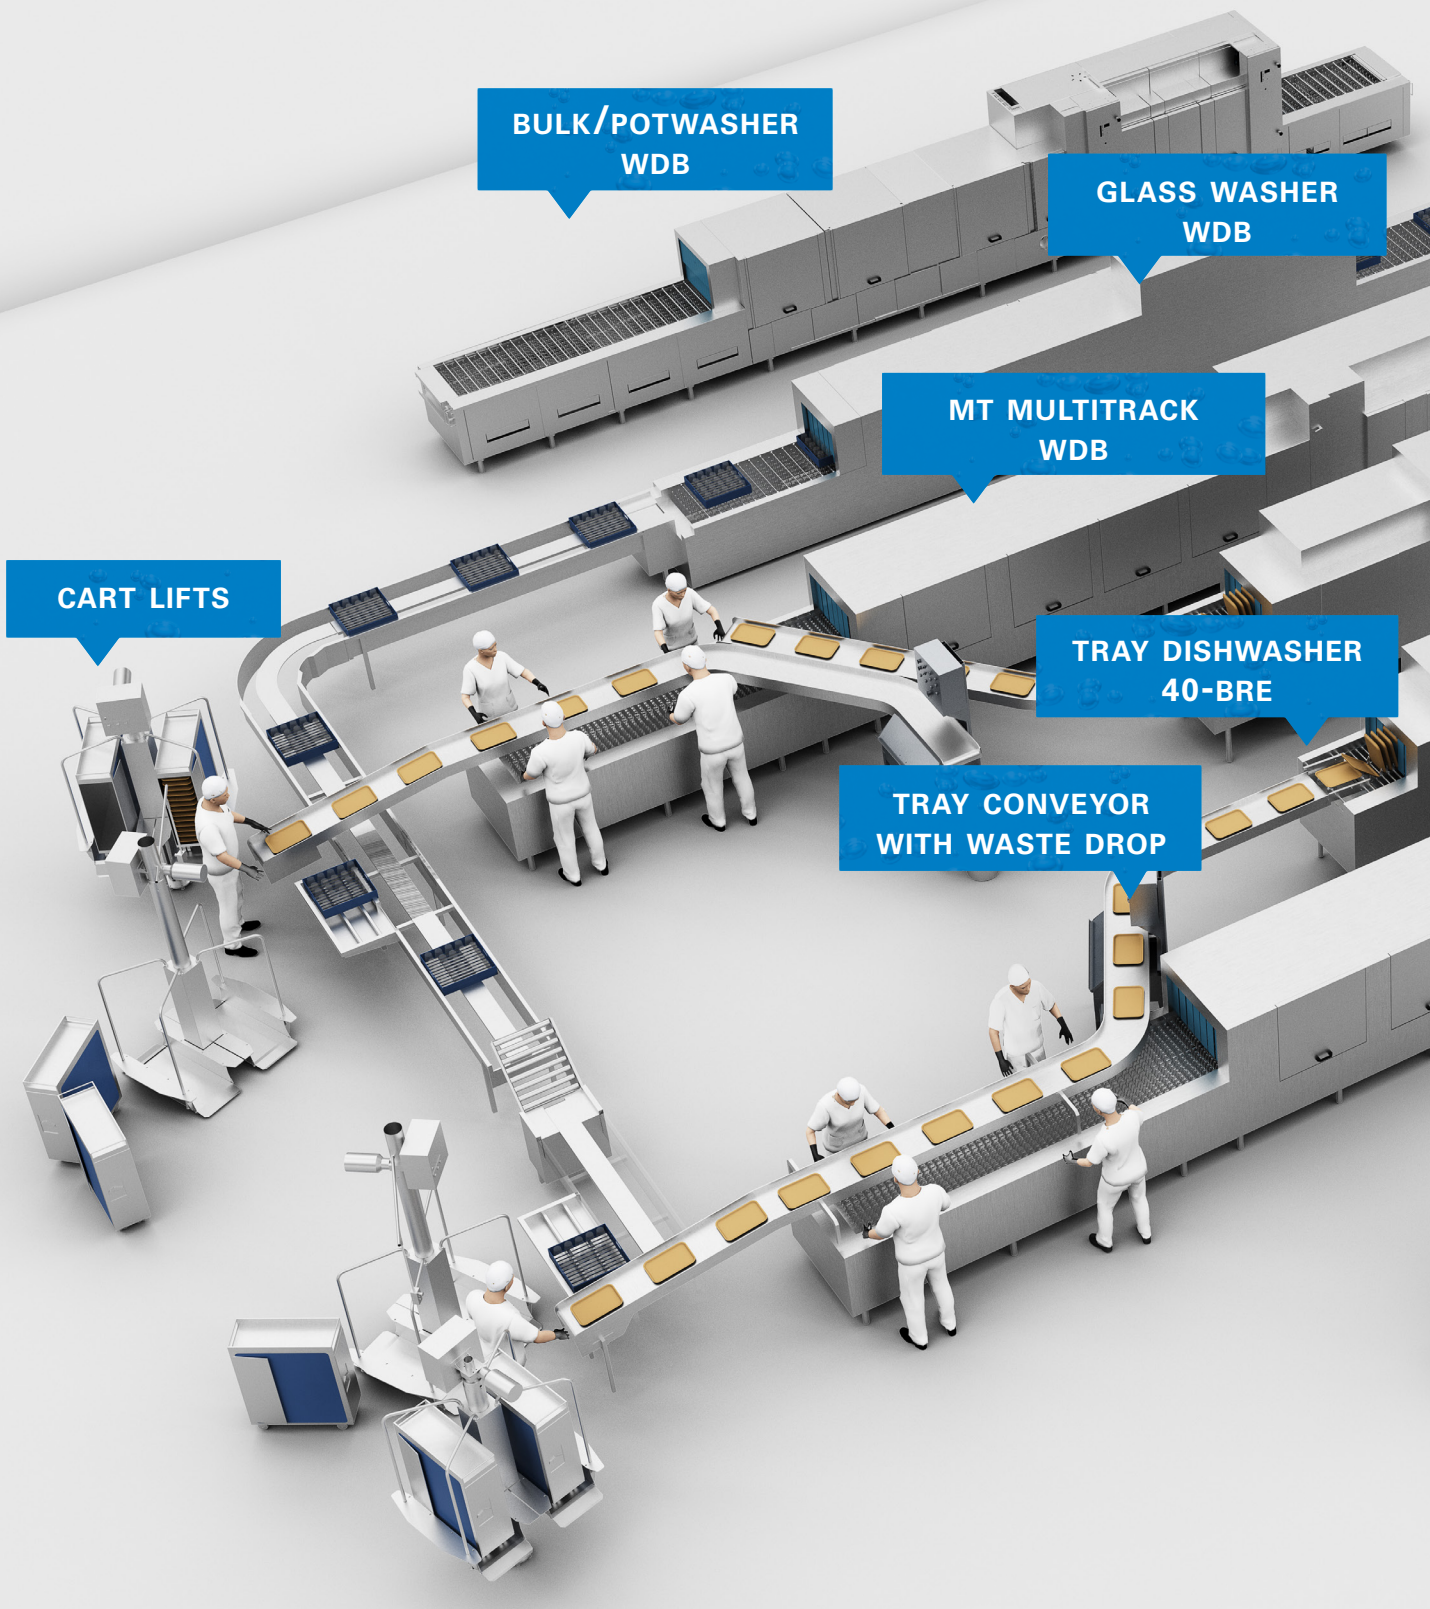

HAINAN AIRLINE CATERING

Hainan Airline Catering needed to upgrade their ware washing and pot washing in their Haikou unit and choose us as their partner.

"We installed the machines from Diskomat and Wexiödisk in 2015 and we are very satisfied with the performance of the machines. The machines' are environmental friendly with green technology providing low running costs, perfect drying result an overall good dishwashing performance.

A superior logistic solution

TRAY STACKER

The image shows a 3D rendering of a commercial kitchen equipment module. It includes a conveyor system with workers in white uniforms handling trays. A blue callout box points to a section labeled 'TRAY STACKER'. Another blue callout box points to a section labeled 'WD-18CW TROLLEY WASHER'. The module is composed of various stainless steel units, including a large trolley washer, a stacker, and a conveyor system. Workers are shown interacting with the equipment, such as loading and unloading trays. The entire setup is designed for high-volume tray washing and stacking.

Key products

that make a difference

From the very beginning, our goal has been to create the world's best dish-washing solutions without compromising on ergonomics or reliability. Our key products are service-friendly and easily accessed for cleaning, helping to prevent unnecessary downtime. They are also developed to meet the various demands of operators, service technicians and other staff working in a large flight catering kitchen. The many unique features within these machines optimize hygiene, save on both water and energy consumption and improve the working environment, every day, all year long.

We make a difference!

FLIGHT TYPE MACHINES

- Double heat recovery for low operating cost
- Outstanding low water consumption
- Large washing zones as standard
- Large final rinse section
- Cutlery track with RO-water
- Customized conveyor for optimal utilization

TRAY WASHERS

- For automatic systems
- Excellent washing and drying result
- Low energy consumption with heat recovery
- Long service life
- Compact design although high capacity

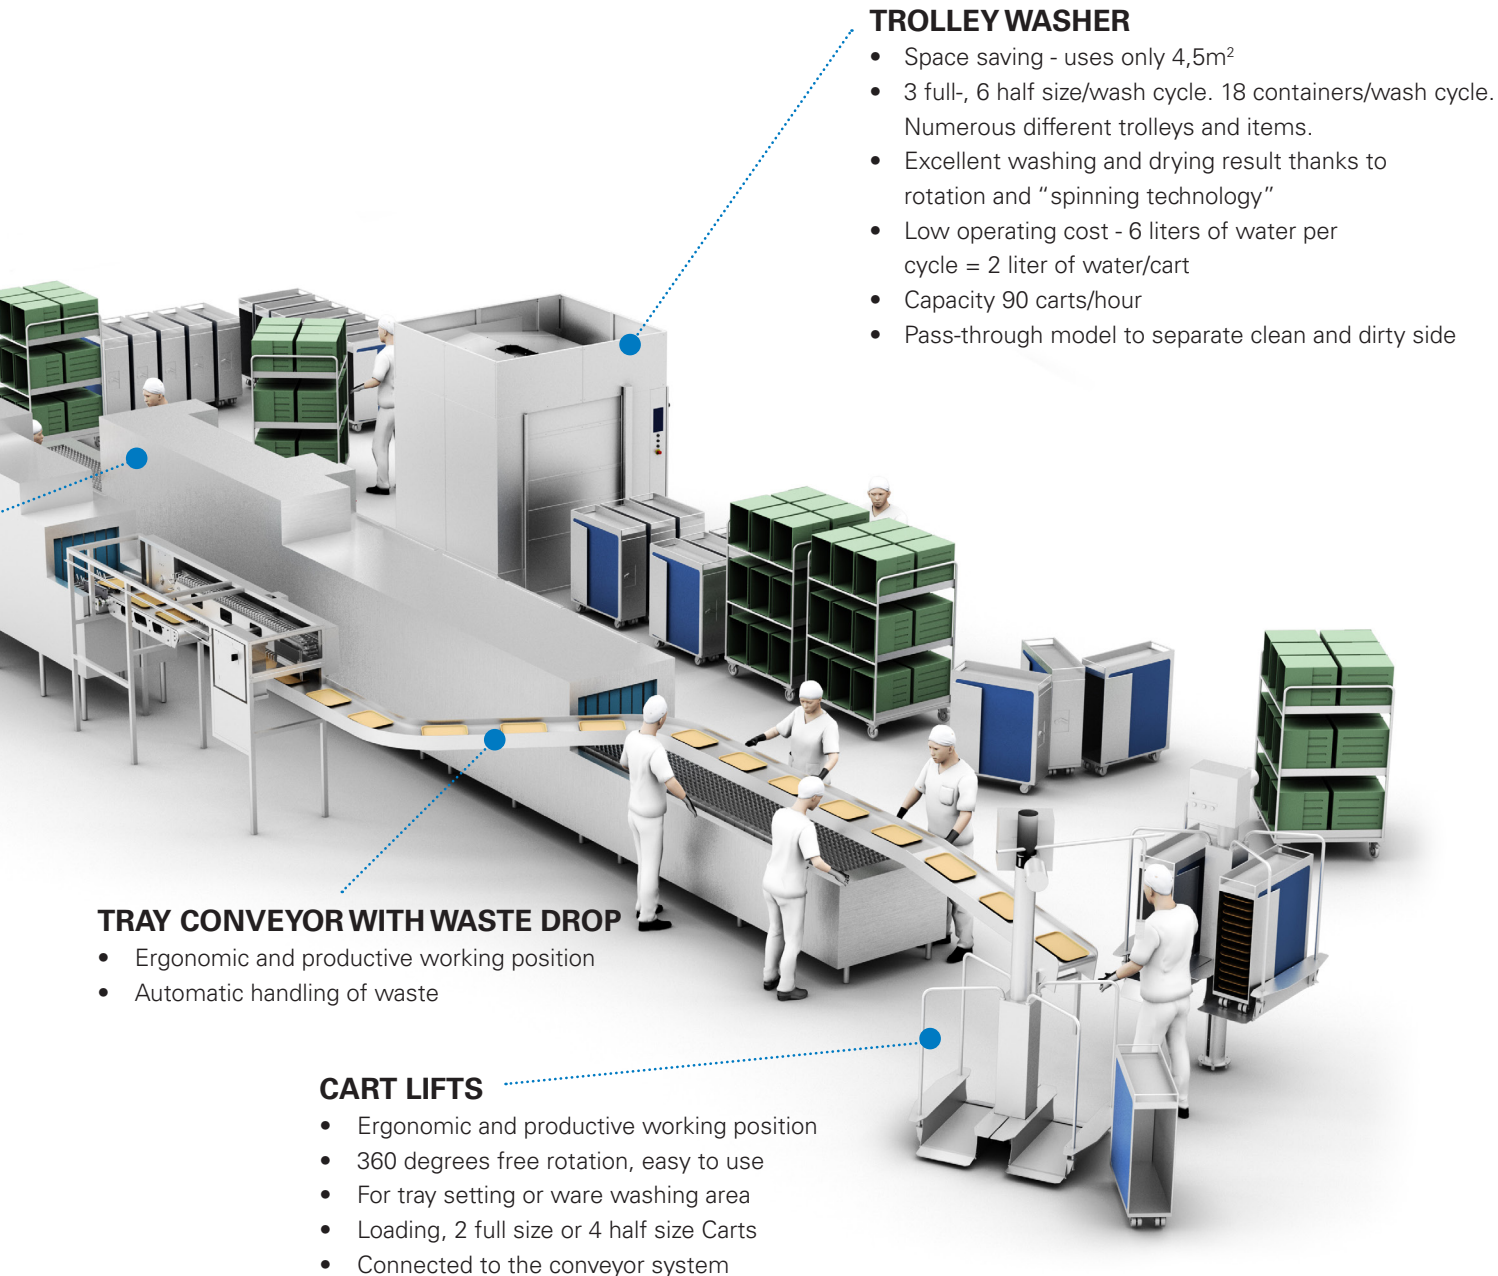

POTWASHERS WITH OR WITHOUT GRANULES

- Granule machines using rotation technology for optimal wash/drying result
- No pre-soaking or scrubbing by hand is needed
- Available as pass-through model and designed to handle heavy duty pot washing

- Adjustable water pressure increases the flexibility
- Powerful and effective
- Hygienic with large washing tank
- Ergonomic with hood automation

CUTLERY SORTERS

- High capacity cutlery sorter for use by air line caterers
- Up to four different types of cutlery to be sorted at the same time
- Used as stand-alone unit or in-line with dishwashing machines

WASTE HANDLING

- The waste is automatically dropped from the tray and conveyor in the waste inlet
- Waste from 30 trays at a time is removed by vacuum to the waste area
- Closed system – no human touch – safe hygiene
- Possible to separate different fractions including food waste
